## Plan for Selective College Preparation

Students seeking selective college admission should complete the most rigorous courses available in each academic discipline. Selective college applicants should also demonstrate high levels of involvement and leadership in extra-curricular activities.

It is recommended that students consult each institution’s website for the most current expectations and requirements.

## Community College Entrance Requirements

Most community colleges place students based on their performance on a designated placement test taken prior to entry. It is recommended that students complete their diploma or GED prior to entrance.

## Technical School Entrance Requirements

A High School Diploma or GED is required for entrance into most technical schools. Consult each institution’s website for the most up-to-date requirements.

## Armed Services Entrance Requirements

A High School Diploma or GED is usually required for entrance into the United States Armed Services. Some branches restrict access for candidates without a high school diploma. Consult individual branches for the most up-to-date requirements.

Description: Advanced physics is an algebra based physics course that includes topics in both classical and modern physics. Knowledge of algebra and trigonometry is required; the basic ideas of calculus will be introduced in connection with physical concepts, such as acceleration and work. Understanding of the basic principles of physics and the ability to apply these principles to solve problems is the major goal of this course. Lab work involving independent collection and analysis of data is a required component. This course will prepare students to be successful on the AP Physics B exam given in May.

If your child has an identified disability, testing accommodations may be available for AP exams. See page 15 in our Student Handbook for further information.

Students will develop their stories from events/issues at school and in town.

AHS TOURING CHOIR (9-10-11-12)
One Semester – 1 credit. May be repeated for credit.

This class provides an inclusive opportunity for singers of all ability levels to improve their singing skills while learning basic music theory and sight-reading skills, with focus on techniques needed to be an independent part-singer in a choral ensemble. Attention will be given to listening skills, improving voice range, diction, vowel production, breath support, and basic musicianship. Repertoire will be mainly “a cappella” (unaccompanied), and will consist of carols and songs that celebrate winter and the holidays therein. Several off-campus public performances will be given during the semester. Offered first semester only.

DIGITAL PHOTOGRAPHY (9-10-11-12)
