## Problem of the Month

# Pi Day

Willow Wind students celebrated Pi Day on March 14<sup>th</sup>, 2011 by sharing their "Problem of the Month" circle projects. Students from grades K-6 displayed their artistic and mathematical masterpieces in their classrooms. Each class rotated through the classroom displays in order for everyone to have a chance to share and explain their discoveries and strategies. Students enjoyed this half-day activity, and an abundance of learning took place in this community building project.

We then celebrated Pi Day after lunch with a Pi dessert. Parents and students donated over twenty pies to share with our Willow Wind community!
